

FSM-O FREE-STANDING COMPACT ENCLOSURES

FSM-O-201004

➤ **FSM-O free-standing compact outdoor enclosures** are made of stainless steel. FSM-O enclosures have integrated side panels in the frame and a surface finish resistant to UV radiation, which protects against harmful environmental influences. The compact welded construction of the enclosure is made of profiled side panels joined together by crossbar profiles. This manufacturing method can meet the highest requirements for rigidity and lends the cabinet 700 kg of load-bearing capacity. Thanks to the design of the bottom frame, FSM-O can be used even without an extra plinth. To create a variety of mounting surfaces and planes, we offer a wide range of system accessories designed for optimal use of the frame profile. We also supply components to control the environment inside the enclosure, such as heating units, filtered fans or active cooling units.

MAIN ADVANTAGES

- Welded compact construction with integrated side panels—surface finish stainless steel with outdoor polyester powder coating
- Load capacity 700 kg
- Single-door enclosure designs
- Can be installed without an additional supporting plinth
- Designer lift-up handle—the standard for all enclosure types
- Easy to close doors thanks to a special locking system
- Maximum use of interior space—possibility of placing the mounting plate between the rear posts
- Side panels integrated in the frame
- 17 sizes from 1 400 × 600 × 300 mm up to 2 000 × 1 000 × 400 mm
- Wide assortment of accessories
- Wide assortment of tailor-made customer solutions—cut-outs according to your requirements before and after final surface finishing accessories
