PALMKI
Design Module

Datasheet

Installation

- Surface mount model
- Fits onto a standard flush-mounted back box

Applications

- Contactless
- USB connection
- Light signal
- Fast and comfortable
- Customization possible

Applications

- Verification
- Identification

This highly stylish design module fits next to any door or on any desk. The combination of the black glossy sensor embedded in the metal front plate gives a surprising design look. This front plate can be customized to everyone's liking. Both the color and the logo can be personalized. The contactless use is an important asset in times where hand hygiene has taken an undeniable place.

The light signal in the PALMKI logo provides the user with information whether their hand has been recognized or not.

- Blue: Hand has been successfully scanned
- Yellow: Hand could not be scanned correctly
- Green: OK: hand has been recognized
- Red: Not OK: hand is not recognized

This PALMKI Authentication module INOX can be particularly used where design is important and the contactless aspect is appreciated.

- **PalmSecure Sensor with Design casing**
  - LED light signal
  - Logo indication
  - Possibility of personalization

- **USB connection and LED cable (connection with PCB unit required)**

- **Internal components:**
  - Infrared sensor
  - LED light
  - USB cable (max. 3m)
  - LED cable (max. 3m)

- **External component**
  - Stainless steel / plastic front plate with 3D printed housing
  - Transparent stripe around the side for clear LED light signal

- **Dimensions of Design model:**
  - Height: 8.5 cm
  - Width: 8.5 cm
  - Depth: 3 cm

- **Execution**
  - Surface mount
  - Fits standard flush-mounted box

- **Always possibility for customization**
  - Enclosure
  - Logo
